Stem Seal Design

Flo-Tite's triple stem seal detail provides for an extended valve cycle life. The primary seal is a seal ring that fits firmly on a taper portion of the stem shoulder. The secondary (back-up) seal is provided by an O-ring and a set of Vee packing rings, energized by belleville washers. This design adjusts packing compression to compensate for wear, pressure or temperature fluctuations.

2PC DIRECT-MOUNT AUTOMATION SERIES

2PC DM85 Econoflo Series

Models:  
#DM85-SS  
#DM85-CS

Valve Features

- 2-Piece Body, Full Port Design
- 1/2" to 2" Sizes
- Threaded NPT Ends
- Body: WCB or CF8M, 316SS
- PTFE, RPTFE or TFM Seats
- Pressure Rating:  
1000 PSI
- Temperature Range:  
-20° F - 450° F

Design Advantages

- ISO 5211 Direct Mounting Pad - Provides for precise shaft alignment & eliminates the need for brackets and couplings
- Improved Seat Material - Extends cycle life and reduces torque
- Blowout Proof Stem
- Locking Device standard for valves with handles
- Adjustable "Live Loaded" Stem Seal

Actuator Sizing Chart

Flo-Tite Actuator Selections are based on units with standard seats with clean fluid only at ambient temperature.

Maximum Temperature Limitations for Direct-Mount Actuators: Electric 150° F; Pneumatic 180° F.

Special Brackets are available for higher temperatures, consult factory.

All valves are sized for line pressure up to maximum 600 WOG. For higher line pressure applications, consult factory to assure proper actuator sizing.

Flo-Tite's "DM" design eliminates mounting brackets and all their possible related problems. Ideally designed for low profile, cost effective industrial applications.
